The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### **DETAILED ACTION**

## Claim Objections

Claim 1 is objected to because of the following informalities: for definiteness and clarity, the phrase, - -the thread carrying apparatus- -, should be inserted between "along" and "with" in line 2. Appropriate correction is required.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 8, the limitation "a multiple-phase weaving machine" renders the claim indefinite, because it is unclear whether it is the same weaving machine as referred to in Claim 1.

#### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Weiland (US-4807450). Regarding Claim 1, Weiland discloses a thread carrying apparatus 13 at which a thread 10 lies in contact or passes along with friction in the

Page 3

Art Unit: 3654

operating state, with the thread carrying apparatus including excitation means 15 for producing oscillations which reduce the frictional force between the thread and the thread carrying apparatus, characterized in that a resonator body 13 is provided at which the thread lies in contact or passes along with friction in the operating state, with the resonator body being designed in such a manner that the excitation means produce resonant structural sound oscillations in the resonator body (Figure 1 and Column 2, Line 43 – Column 4, Line 2). Regarding Claims 6, Weiland further discloses the resonator body comprises an electromagnetically excitable oscillating element in which the electromagnetic energy for the excitation of at least one oscillating element can be coupled in a wireless manner by means of a transmission device (Figure 1 and Column 3, Lines 5-7).

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Weiland (US-4807450) as applied to claim 1 above, and further in view of Lincke (US-4744394). Regarding Claim 10, Weiland is silent about a textile weaving machine in combination with the threading carrying apparatus. However, Lincke discloses a thread drum 11 of a drum store 1 of a textile weaving machine with magnetic inserts 116, 117 (Figures 1 and

Art Unit: 3654

2 and Column 2, Lines 39-42). It would have been obvious to one of ordinary skill in the art at the time the invention was made to use Lincke's weaving thread drum and magnets as the resonator body and excitation device, respectively, to produce resonant structural oscillations in the drum reducing the friction between the drum and thread as taught by Weiland thereby increasing the speed and efficiency of the loom.

# Allowable Subject Matter

Claims 7 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### Response to Arguments

It is noted the withdrawn claims, 2-5, in the amendment filed June 30, 2006 do not show the amendments made in the preliminary amendment filed on October 16, 2003. Applicant ensure the most recent amendment reflects these amendments.

With respect to Applicant's arguments starting on page 8, line 14 to page 10, line 11 and regarding Claims 1 and 6, applicant argues the thread carrying apparatus of Wieland is not part of a weaving machine. In response to applicant's arguments, the recitation "for a weaving machine" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a

Art Unit: 3654

structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

With respect to Applicant's arguments starting on page 10, line 12 to page 11, line 4 and regarding Claim 10, applicant argues the thread carrying apparatus of Wieland is not part of a weaving machine. In response to applicant's arguments, the recitation "a weaving machine" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

#### Conclusion

Applicant's amendment, the addition of "for a weaving machine" to line 1 of Claim 1, necessitated the new ground(s) of rejection presented in this Office action.

Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3654

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William E. Dondero whose telephone number is 571-272-5590. The examiner can normally be reached on Monday through Friday 7:00 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kathy Matecki can be reached on 571-272-6951. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
